Managing workspaces and users in the Cloud Central account

[After you perform initial setup](#), you might need to later manage users, workspaces, and service connectors.

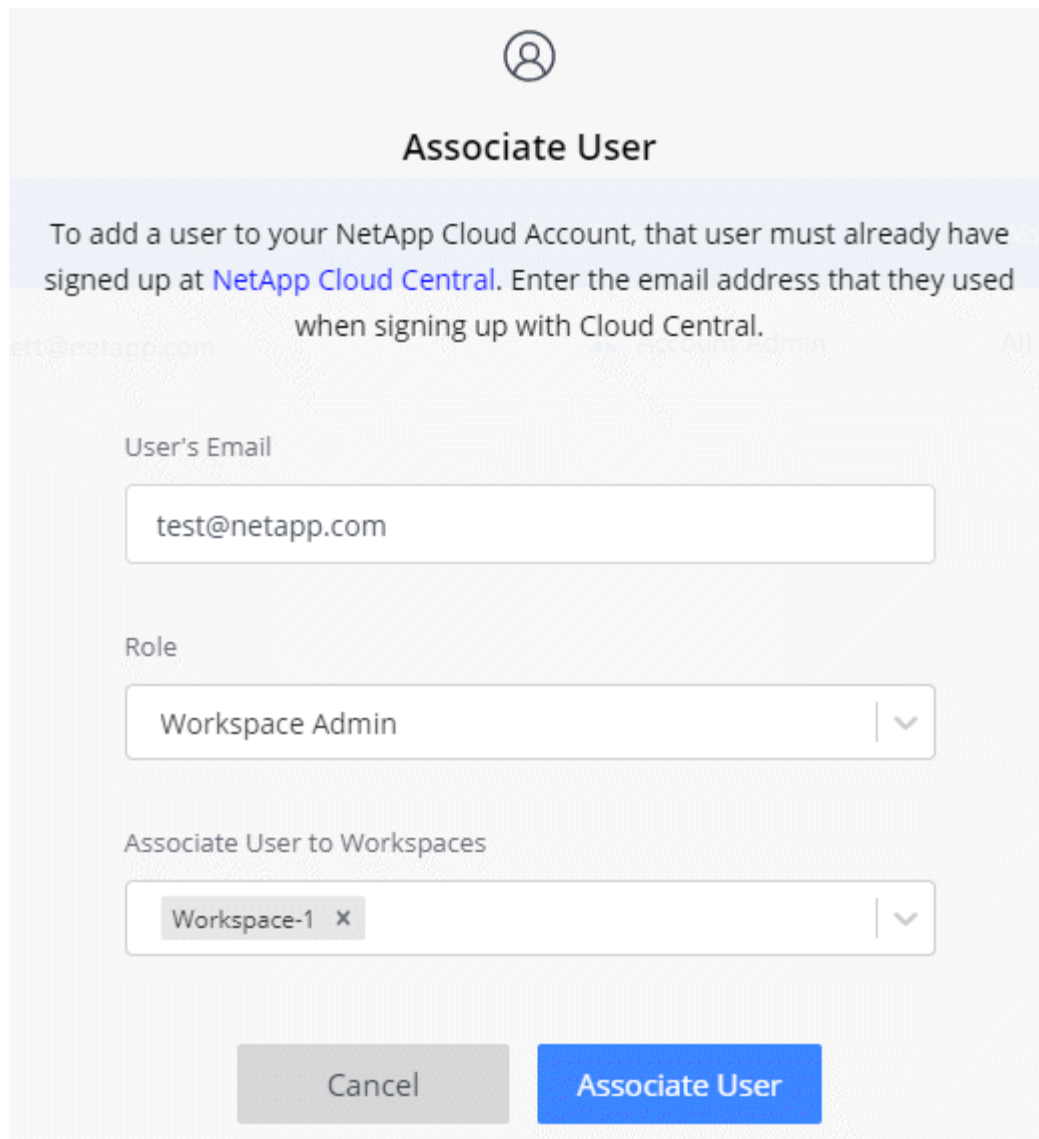

[Learn more about how Cloud Central accounts work.](#)

Adding users

Associate Cloud Central users with the Cloud Central account so those users can create and manage working environments in Cloud Manager.

Steps

1. If the user has not already done so, ask the user to go to [NetApp Cloud Central](#) and create an account.
2. In Cloud Manager, click **Account Settings**.
3. In the Users tab, click **Associate User**.
4. Enter the user's email address and select a role for the user:
 - **Account Admin**: Can perform any action in Cloud Manager.
 - **Workspace Admin**: Can create and manage resources in assigned workspaces.
5. If you selected Workspace Admin, select one or more workspaces to associate with that user.

The image shows a modal dialog box titled "Associate User" with a user icon at the top. The main text explains that a user must be signed up at NetApp Cloud Central and provides instructions to enter their email. There are three input fields: "User's Email" containing "test@netapp.com", "Role" set to "Workspace Admin", and "Associate User to Workspaces" containing "Workspace-1". At the bottom are "Cancel" and "Associate User" buttons.

Associate User

To add a user to your NetApp Cloud Account, that user must already have signed up at [NetApp Cloud Central](#). Enter the email address that they used when signing up with Cloud Central.

User's Email

test@netapp.com

Role

Workspace Admin

Associate User to Workspaces

Workspace-1

Cancel Associate User

6. Click **Associate User**.

Result

The user should receive an email from NetApp Cloud Central titled "Account Association." The email includes the information needed to access Cloud Manager.

Removing users

Disassociating a user makes it so they can no longer access the resources in a Cloud Central account.

Steps

1. Click **Account Settings**.
2. Click the action menu in the row that corresponds to the user.

2 Users

Name	Email	Role	Workspaces	
Ben		Account Admin	All Workspaces	
test	test@netapp.com	Workspace Admin	None	

3. Click **Disassociate User** and click **Disassociate** to confirm.

Result

The user can no longer access the resources in this Cloud Central account.

Managing a Workspace Admin's workspaces

You can associate and disassociate Workspace Admins with workspaces at any time. Associating the user enables them to create and view the working environments in that workspace.

Steps

1. Click **Account Settings**.
2. Click the action menu in the row that corresponds to the user.

2 Users

Name	Email	Role	Workspaces	
Ben		Account Admin	All Workspaces	
test	test@netapp.com	Workspace Admin	None	

3. Click **Manage Workspaces**.
4. Select the workspaces to associate with the user and click **Apply**.

Result

The user can now access those workspaces from Cloud Manager, as long as the service connector was also associated with the workspaces.

Managing workspaces

Manage your workspaces by creating, renaming, and deleting them. Note that you can't delete a workspace if it contains any resources. It must be empty.

Steps

1. Click **Account Settings**.
2. Click **Workspaces**.

3. Choose one of the following options:

- Click **Add New Workspace** to create a new workspace.
- Click **Rename** to rename the workspace.
- Click **Delete** to delete the workspace.

Managing a service connector's workspaces

You need to associate the service connector with workspaces so Workspace Admins can access those workspaces from Cloud Manager.

If you only have Account Admins, then associating the service connector with workspaces isn't required. Account Admins have the ability to access all workspaces in Cloud Manager by default.

[Learn more about users, workspaces, and service connectors.](#)

Steps

1. Click **Account Settings**.
2. Click **Service Connector**.
3. Click **Manage Workspaces** for the service connector that you want to associate.
4. Select the workspaces to associate with the service connector and click **Apply**.
