- Disabling Cloud Compliance ..... 1
  - Deactivating compliance scans for a working environment..... 1
  - Deleting the Cloud Compliance instance ..... 2

# Disabling Cloud Compliance

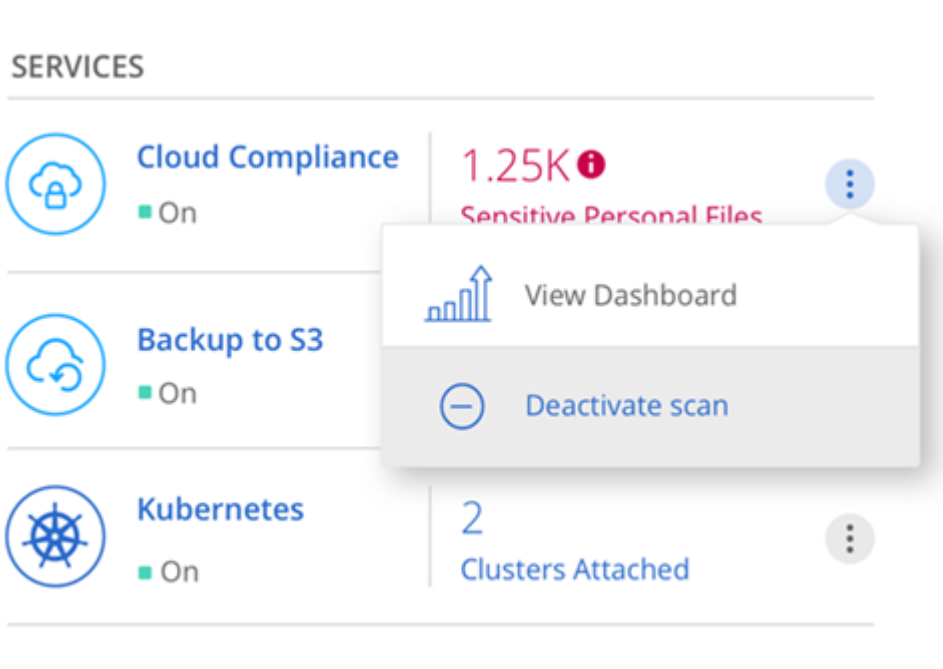

If you need to, you can stop Cloud Compliance from scanning one or more working environments. You can also delete the Cloud Compliance instance if you no longer want to use Cloud Compliance with your working environments.

## Deactivating compliance scans for a working environment

When you deactivate scans, Cloud Compliance no longer scans the data on the system and it removes the indexed compliance insights from the Cloud Compliance instance (the data from the working environment itself isn't deleted).

### Steps

1. At the top of Cloud Manager, click **Working Environments**.
2. Select the working environment.
3. In the right panel, click the action icon for the Cloud Compliance service and select **Deactivate scan**.

You can also disable compliance scans for a working environment from the Scan Configuration page by clicking the  icon and selecting **Deactivate Compliance**.

# Deleting the Cloud Compliance instance

You can delete the Cloud Compliance instance if you no longer want to use Cloud Compliance. Deleting the instance also deletes the associated disks where the indexed data resides.

## *Step*

1. Go to your cloud provider's console and delete the Cloud Compliance instance.

The instance is named *CloudCompliance* with a generated hash (UUID) concatenated to it. For example: *CloudCompliance-16bb6564-38ad-4080-9a92-36f5fd2f71c7*
